PROFESSIONAL SUMMARY

Application support professional with 3+ years at Digival, serving university systems used by 2,000+ users. Built an API dashboard that reduced daily verification from approximately two hours to under five minutes. Combines bilingual user support and API diagnostics with full-stack development, business websites, Python automation, and hands-on cloud/DevOps projects.

CORE TECHNICAL SKILLS

Application Support: Tier 1/2 Support, Learning Management Systems (LMS), User Acceptance Testing (UAT), Regression Testing, Incident Escalation, User Training, Documentation

Web Development: JavaScript, TypeScript, React, Next.js, Node.js, Express, HTML/CSS, PostgreSQL, Prisma, Supabase, MongoDB, Git/GitHub

APIs & Automation: REST APIs, Postman, Browser DevTools, JSON, Axios, Python, SQLite

Cloud & DevOps Projects: Linux/Ubuntu, SSH, Oracle Cloud, Docker, Docker Compose, GitHub Actions, GHCR

Additional Coursework: AWS EC2, Security Groups, Kubernetes, Terraform, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Digival IT Solutions — Jeddah, Saudi Arabia **2023 – Present**

Senior Onsite Support Engineer (promoted from Onsite Support Engineer)

- Supported 2,000+ students, faculty, and administrative users, resolving access, authentication, and workflow issues; maintained 98% client satisfaction.
- Built an API-driven exam-readiness dashboard using JavaScript and Axios, reducing daily verification from approximately two hours to under five minutes.
- Diagnosed REST API issues using Postman and browser DevTools; coordinated 50+ software defect escalations and performed UAT and regression testing with developers.
- Created Arabic/English procedures and onboarding guides, trained users, and supervised one colleague. Following the onsite contract, provided intermittent remote support.

SELECTED PROJECTS

- **Riyasat — Next.js, TypeScript, Supabase:** Built a property management app with rental agreements, payment tracking, financial reporting, role-based access, calculation tests, and CSV import/export.
- **naqlapp — Logistics Website & Truck Dispatcher TMS:** Built a logistics website and transport management system covering trip dispatch, fleet/driver assignments, delivery evidence, and billing readiness with role-based access.
- **TurnUp — Personal Application & Deployment:** Built a React/TypeScript multiplayer app with Node.js, Socket.IO, PostgreSQL, and JWT authentication. Automated continuous integration and delivery (CI/CD) to Oracle Cloud using Docker Compose, GitHub Actions, versioned container images, health checks, database backups, and rollback.
- **Omer Global LLC — Business Website:** Delivered a website presenting services and enquiry options for a manpower and contracting company: omergloballlc.com.

EDUCATION & PROFESSIONAL DEVELOPMENT

- **Bachelor of Computer Applications (BCA):** Osmania University, Hyderabad, India
- **Master of Business Administration (MBA):** In progress, final year
- **100xDevs Coursework:** Web Development & DevOps Fundamentals

Languages: Arabic & English: Fluent | Hindi & Urdu: Native
